

### Government Fix 1

Your task here is to identify an area of government which needs to be improved, and then – in writing – walk the reader through the ease or challenges of this task. Use the back if you need more room

Identify problem

What is the problem in government you see (1-5 words)

Explain the problem. Why is this a problem? Is it just inefficient, or does it actually inhibit government operations? To what extent of severity does it do so?

Think about the part of government you are writing about. (forget for a moment if it is conducted well or poorly). What is its purpose? (ie, linkage institution? Passing laws? Something else?)

Consider alternatives

What are alternative procedures/laws/practices which would better achieve this purpose? Please list 2-3 options.

Of the options listed, which makes the most sense? (select one to write about from this point forward...)

How does your selection honor the philosophy of Checks and Balances or Separation of Powers or Federalism?

Realistic solution?

What needs to happen constitutionally to make your solution/vision occur?

What obstacles will there be to achieving your solution/vision?

What strategies might be employed to overcome any obstacles necessary to actualize your solution?

## Government Fix 2

Your task here is to identify an area of government which needs to be improved, and then – in writing – walk the reader through the ease or challenges of this task. Use the back if you need more room
