

# Trek Philosophy

In this galaxy, there's a mathematical probability of three million Earth-type planets.  
And in all of the universe, three million-million galaxies like this.  
And in all of that – and perhaps more – only one of each of us.

What we leave behind is not as important as how we lived  
The needs of the many outweigh the needs of the few, or the one.

Without followers, evil cannot spread.

Compassion. That's the one thing no machine ever had.  
Maybe it's the one thing that keeps humanity ahead of them.

Once you have eliminated the impossible,  
whatever remains, however improbable, must be the truth.

There's no such thing as the unknown.  
Only thoughts temporarily hidden, temporarily not understood.

Time offers many opportunities, but it rarely offers second chances.
